

# INC INSTALLS PERIMETER SECURITY TO PROTECT A WAREHOUSE FACILITY

**2**

**INC  
INSTALLERS**

**10**

**CAMERAS**

**2 DAY**

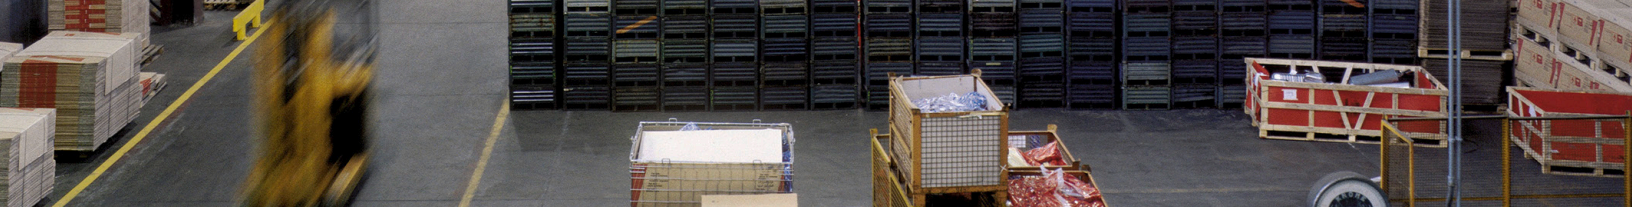

**INSTALLATION  
TIME**

A warehouse owner needed security cameras installed to cover their outside perimeter in order to achieve a blind-spot-free barrier for theft protection. The project required running cables from the IT equipment located inside the facility to the exterior, installing and adjusting 10 cameras, and installing the network video recorder (NVR) equipment in the IT closet.

“We are extremely grateful to have found INC! From the beginning, they have been nothing but accommodating and professional. Their teams' hard work is outstanding and why we will continue to use them in the future!”

## THE GOAL

Install a reliable security camera system that covers all the angles, looks neat and professional, and allows the company to remotely access camera footage in order to protect their business.

# THE APPROACH

- Met with the client to determine needs and to visit the site.
- Collaborated with the client to develop a scope of work.
- Scheduled the installation and arranged for a scissor lift.
- Ran cables from the IT closet to the building exterior.
- Mounted and connected the IP cameras.
- Positioned and focused the cameras, ensuring their fields of view reflected the request.
- Installed the NVR equipment in the IT closet.
- Tested the entire security system.
- Provided cables, jacks, wall plates, patch cords, a patch panel and a rack.

# RESULTS

- INC installed all 10 cameras and wired the security system in only two days.
- The customer now has the security camera coverage they were looking for. They can monitor and protect their entire property.
- Their system allows them to remotely log in and access the security footage.
- All installed cables and cameras maintain the neat appearance of the facility.

## SERVICES

- Audio Video Installation
- Cable Supplies and Distribution
- Site Surveys
- Demarc Extension
- IT Equipment Installation
- Kitting Services
- National Roll Out
- Network Wiring Testing
- Professional Wireless Network Installation
- Staging and Logistics
- Structure Cable Installation
